

Face To Face Esthetics is proud to be a Certified Platinum Dealer of VITAL THERAPY skin care products! VITAL THERAPY FOR BEAUTIFUL SKIN is made from the **highest quality, non-toxic, most effective ingredients available**, is always paraben free, and is *never* tested on animals.

VITAL THERAPY products have been developed by Ted Keller, R.Ph., DNM (pharmacist and doctor of naturopathic medicine). Keep reading to learn what led Ted to develop these amazing products:

VITAL THERAPY ... FOR BEAUTIFUL SKIN

I have been asked many times to explain why I think VITAL THERAPY products are better than the other cosmetic products on the market and why I have developed these particular products when stores, salons, and physician's offices carry thousands of various products to enhance the beauty of the skin.

A recent article in The Townsend Letter for doctors and patients, and The Wall Street Journal, concerning the rise of breast cancer in the United States, stated that some of the culprits in contributing to this increase were toxic ingredients and mutagenic ingredients commonly found in almost all cosmetic products.

Most skin care products contain ingredients like preservatives, dyes, and chemicals that have No Value in the beautification of the skin, and may in fact contribute to hormonal or endocrine changes that are responsible for breast cancer. It is no secret that anything applied to the skin can be and almost always is absorbed into the blood stream, and must be handled as a toxic compound. *These ingredients do not evaporate after application to the skin.*

An example of this would be the chemical preservatives called parabens. Parabens are endocrine disrupters that mimic the hormone estrogen and have been found to accumulate in the tissue of women with breast cancer. Safer alternatives are available such as essential oils that are anti-bacterial, anti-fungal and anti-viral, and do not disrupt endocrine systems and do not accumulate in the breast tissue. These essential oils are not as stable as parabens and thus VITAL THERAPY products do not have long shelf lives; that is, they must always be fresh and they must be turned over in two years. Parabens on the other hand may increase shelf life up to 6 to 8 years. This is why the major cosmetic companies use these parabens.

Other dangerous chemicals are added to most cosmetic products to enhance the texture, elegance, or appearance of the product. VITAL THERAPY products produce this same elegance without toxic ingredients. It is more costly to do this, but the effort is worthwhile as these poisons are eliminated. VITAL THERAPY products also use the exact isomer or the “*chirally correct*” form of a nutrient, which is more efficiently utilized by the skin. *No unnecessary ingredients are added to the products. If the ingredient does not perform some very important function in the product, it is not added.*

VITAL THERAPY products are the finest, least toxic skin nutrients found on the market at a price that is reasonable.

It is interesting to note that some recent studies have proven the incorporation of toxic compounds in skin care products has been shown to cause an increase in skin cancer, as well as dramatically reducing the effectiveness of the products. I believe this is the reason my products are so effective compared to other products with similar ingredients.

SKIN CARE GOALS:

Improve the health, and thus the appearance of the skin. This is done by improving blood circulation and oxygenation of the skin, maintaining the skin’s normal pH, revitalizing the skin cell membranes and connecting tissues, detoxifying and neutralizing toxins found in skin tissues, and produce real, cumulative, beneficial, and long lasting visible results.

ADDITIONAL BENEFITS OF USING VITAL THERAPY PRODUCTS:

VITAL THERAPY products are nutrient concentrated, with cutting edge synergistic activity that achieve results rapidly. With some products results can be seen in as little as 30 minutes.

Retail product returns on VITAL THERAPY products have historically been less than 0.01% of sales. People use these products, and product information is available easily. VITAL THERAPY products are affordable.

SKIN ANALYSIS:

Institutions teaching estheticians about skin care classify skin according to skin conditions, usually into five skin types. These types are dry, oily, aging, acneic, and combination t-zones (treatment zones). The fact is, all of the above skin conditions are caused or exacerbated by the same poor habits, such as:

1. Poor nutrition.
2. Dehydration.
3. Over-exposure to the sun, tanning beds, pollutants, toxins, and over-use of toxic skin care products.
4. Over-use of skin treatment procedures such as peels and laser.

5. Lack of adequate exercise and stretching.
6. Inadequate sleep.
7. Stress and illness.

By addressing the above conditions and utilizing VITAL THERAPY cutting edge skin care products and protocols, we can improve and normalize all skin types.
